Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 40, 43 and 47-52 remain rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 8 of U.S. Patent No. 6,673,760 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because the patented claim is drawn to a rinse agent comprising a sheeting agent as presently claimed, in combination with a humectant comprising at least one of glycerine and sorbitol. The weight ratio of total humectant to total sheeting agent is greater than 1:3. Claims 43 and 48 are drawn to a wide MW range commonly encountered in EO-PO block copolymer surfactants, and claims drawn to specific sequences of EO and PO blocks are obvious in view of the recitation of EO-PO block copolymers generally. The percentages recited in claim 47 are obvious over the recitation of the combination of sheeting agent and humectant generally. It would have been obvious at the time that the invention was made to make a composition as

Art Unit: 1751

recited in these claims because claim 8 of the patent generically recites compositions comprising the presently-recited constituents.

Allowable Subject Matter

3. Claim 41 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

4. Applicant's affidavit is persuasive. Propylene glycol and glycerol provide sheeting action which is superior to that of the other solvents which are disclosed in the prior art as being generally equivalent.

5. Regarding the double patenting rejection over the parent, applicant's arguments are not persuasive. Applicant simply states that there are "many differences" between claim 8 of the parent and the rejected claims, without saying what those differences are, why they should distinguish the present claims, or why the rejection is in error.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 1751

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
